UNI/REG only - if unable to carry out intended visit detail reason below:

No Kames staff available to accompany FHI on site visit due contact with another person confirmed positive for COVID.

**Additional Case Information:**

Remote inspection undertaken on 22/07/2021 by [REDACTED], observed by [REDACTED].

Last stock of fish moved off site in Sept 2020

No treatments on current stock as it only moved on site last week (15/07/2021)

Site management have decided to extend fallow period in between cycles due to issues with fungus. The site is frequently treated with formalin in the summer months to keep fungus levels low. No fungus observed on fish by site staff yet in this cycle.

Only 2 of the five cages stock at the time of the remote inspection. Later in the cycle, as the fish grow, they will be graded and thinned out into the other cages on site.

There is one wooden cage on site that is only used to transport fish from the shore. When fish are moved on to the site they are transported by lorry, and discharged into this wooden cages at the shore. The fish are then transported in the cage to the plastic circle cages in the centre of the loch.

No Kames staff available to accompany FHI on site visit due contact with another person confirmed positive for COVID.
