4 Receiving water to which the fish will be introduced

Name of water	<input type="text"/>		
Nearest town	<input type="text"/>		
Location give national grid reference or supply a map showing the site			
<input type="text"/>	<input type="text"/>		
Type of water:			
canal	<input type="checkbox"/>	river	<input type="checkbox"/>
fully enclosed stillwater	<input type="checkbox"/>	on-line stillwater	<input type="checkbox"/>
stillwater in flood plain	<input type="checkbox"/>	screened stillwater	<input type="checkbox"/>
manmade	<input type="checkbox"/>	natural	<input type="checkbox"/>

Screening

What size of fish are the screening arrangements designed to contain?	<input type="text"/>
Provide details of cleaning arrangements	<input type="text"/>
For stillwaters, approximate size of water	<input type="text"/> acres <input type="checkbox"/> hectares <input type="checkbox"/>
Does the site have a conservation designation such as a SSSI or SAC?	No <input type="checkbox"/> Yes <input type="checkbox"/> Type of order <input type="text"/>

5 The fish introduction - SINGLE APPLICATION

Purpose of introduction	<input type="text"/>
When is the planned start-date of introduction?	<input type="text"/>
Has the species been stocked before? If so, which?	<input type="text"/>
If the fish are from a hatchery please provide the OS Grid Reference of the origin of the brood stock	<input type="text"/>

5 The fish introduction - SINGLE APPLICATION (Cont.)

Details of fish involved Species	Total number	Average Size length/Weight (cm/kg)	Total Weight kg

Ploidy: triploid diploid female male

6 Source of the fish being introduced

Location Give national grid reference or supply a map showing the site

Name of water or farm fish came from see guidance notes for more details

Who owns (or leases) fishing rights on the source water if not a fish farm

Removal EA Reference number of consent for removing fish from England or Wales if applicable

Name of and details of any temporary fish-holding facility used see notes overleaf

Is the source water under a Designated Area Order, or any other form of movement restriction?

No Yes Unknown

7 Signature and declaration

If you give any information which is incomplete or inaccurate

- we will return your application
- we will not grant consent.

I have read and understood this form and the data protection notice in the enclosed guidance notes. To the best of my knowledge and belief, the information I have given is correct.

Applicant's signature	<input type="text"/>
Print name	<input type="text"/>
Date	<input type="text"/>

Disclaimer

- A consent does not guarantee the health status, condition or suitability of the fish that you plan to introduce.
- The Scottish Government is not liable for any damage associated with the introduction of fish covered by a consent under The Salmon and Freshwater Fisheries (Consolidation) (Scotland) Act 2003.

What happens next

Please post or fax the completed and signed form to:

FRS Freshwater Laboratory
Faskally
Pitlochry PH16 5LB
TEL: 01796-472-060
FAX: 01796-473-523

Your Application to introduce fish, fry or ova

The Salmon and Freshwater Fisheries (Consolidation) (Scotland) Act 2003

Making an application

We have produced this application form to help you apply for permission to introduce fish. It asks you for all the information we need to decide if the introduction can go ahead as you plan. *If you introduce fish or possess fish with the intention of introducing them without consent you may be liable for prosecution.*

You should send in your application

- no more than 10 weeks in advance
- allowing at least 20 working days before the planned introduction date.

This Form is for single introductions

If you need to introduce fish on a number of different dates e.g. commercial stillwater fisheries, please complete as a block application in Section 4. Your consent if issued will be for 12 months from the date of the first introduction. Otherwise e.g. a one off annual stocking for an angling association then please complete section 4 as a single introduction.

There is more about this in the Guidance notes which came with this form.

Who should fill in the form?

We can only issue consent to a single individual, named as the 'applicant' on the form. This individual is responsible for

- the application
- ensuring that the fish introduced are as described on the application form.

If the application is made by an organisation such as an angling club, an individual person should apply for the consent on behalf of that organisation.

Please use black or blue indelible ink and make sure the form is signed by the applicant.

After you fill in the form

Send the application form to the address printed on the form.

When we get your application we will

- send you an acknowledgement by post (giving the name of the person processing your application)
- process your application and send you our decision within 20 working days. *We aim to do this within 10 working days.*

In some cases it may take longer to process your application, for example if

- the conservation status of the receiving water means we have to consult an external organisation.

Issuing your consent

If you can go ahead and introduce the fish to your site as planned, we will send you written consent.

When you introduce the fish to the site, you must have the consent with you.

If we cannot give you permission to go ahead with introducing the fish as planned we will write and tell you why.

What the consent means

The written consent is a one-off 'permission' issued for specific date(s), site and consignment of fish.

Once you have received our consent you must not change

- the fish you plan to introduce
- the date you plan to introduce the fish

For example, you must not introduce

- a different species of fish
- fish from a different source
- a significantly different size, weight or number of fish

If under exceptional circumstances such an unavoidable situation arise, you do you should notify the FRS as soon as possible.

We may attend the introduction to check that you introduce the fish specified on the consent form. If the fish are not as you described, we may

- stop the introduction
- start proceedings to prosecute you

When you introduce the fish to the site, make sure that you have the SG35 consent with you.

If, for any specified reason, you cannot introduce the fish on the date you planned, please contact the FRS Freshwater Laboratory on 01796 472060 to amend the date of the introduction. Providing the delay is less than 4 weeks, you may not have to re-apply. *See the Guidance notes which came with this form for more information.*

Supplier and source of the fish to be introduced

We need to know exactly where the fish came from (the supplier and source), and whether they have been held in any intermediate sites.

Fish supplied by a third party

If you are buying the fish from a supplier or dealer, please give their details in '2 Supplier' and ask them for the information to answer the questions in '5 Source of the fish being introduced'.

Source Water

You must give the name and location of the source water the fish were obtained from. Please give us the Ordnance Survey national grid reference (OSNGR) from an OS map.

You can also send us a map of the area with the site marked clearly on it, using its full name.

There is more about this in the 'Guidance notes' which came with this form.

Hatcheries

If you are introducing fish that have been reared in hatchery facilities, you should provide details in box 5.

Intermediate or temporary holding sites

If the fish have been held at an intermediate site, such as a fish dealer's premises, we need to know where it was. If they were there for less than 6 months, we still need to know the original source water.

Monitoring the success of stockings

If you are engaged in a stocking or enhancement programme we strongly advise that you put a monitoring programme in place to gauge the success of the activity.

Introducing certain non-native fish species

If you are applying to introduce non-native fish species listed in the prohibition of Keeping or Release of Live Fish (Specified Species) (Scotland) Order 2003, you must have the appropriate Scottish Government Licences. These may take up to 2 months to process.

There is more about this in the Guidance notes which came with this form.
