

Response to  
National Planning Framework  
Consultation 2008 for Scotland.

Dear Sir or Madam

I am writing to you in the hope that you will back the campaign by DORCAF to build a railway bridge across the Dornoch Firth. This project has been a long awaited desire for us living in the Far North of Scotland. If parliament agrees to the construction of the bridge it would bring tremendous benefits for us. A 45 minutes saving in the journey from Thurso to Inverness and haulage of freight on the line would take off. We are hoping to start a project to use the energy of the Pentland Firth for generating electricity. Therefore an efficient and speedy railway from the South will be a necessity.

Yours sincerely

Community Council
