Received 31/3/08

Dear Sirs,
Scottish Climate Change Bill

I welcome the Bill, and I would like it to:

- reduce greenhouse gas emissions by 80% by 2050
- deal with consequences without further harm to environment
- help Scottish wildlife to adapt to climate change.

I am a wildlife recorder (webs etc) amateur weather watcher + phenology recorder, + have already witnessed climate change + its effects over last 40 years in Scotland.

This is an individual response + may be made public if you wish.

I would like to receive climate change reports as they become available.

Yours sincerely,

Paul Carter
