

Statistics Release

CARE HOMES, SCOTLAND MARCH 2005

Introduction

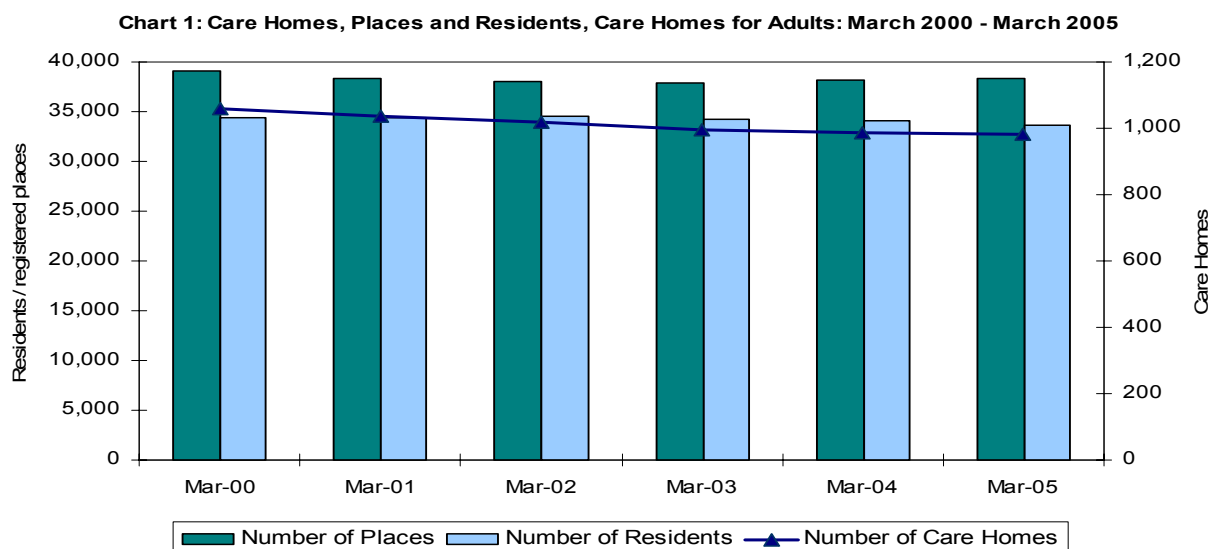

The purpose of this Statistics Release is to present national figures for care homes for adults in Scotland. All figures relate to the 31 March 2005 and are provisional and, as such, subject to change. The final figures will be published in the next care home census statistical release. Final figures for the period March 2000 to September 2004 are also included.

The information is derived from the Scottish Care Home Census which combines two former surveys – ‘The Residential Care Homes Census’ and the ‘Private Nursing Home Census’. Returns are made to the Scottish Executive by individual care homes directly or via Scottish local authorities. Refer to the background note for further details relating to the census of care home establishments.

All figures in this release omit care homes that deregistered to become Housing Support services. Information on the number of former care homes deregistering for this reason can be found in annex F.

Main Points

- At 31 March 2005 there were a total of 1,523 registered care homes providing 43,700 places to 38,295 residents. Annex A provides further details.
- The number of registered places in care homes for older people was 38,327. This had increased for the fourth consecutive census but is still 1.9 per cent down on the March 2000 level.
- Of the 980 care homes for older people, 185 were in the Local Authority/NHS sector (18.9 per cent), a further 643 were in the private sector (65.6 per cent) and the remaining 152 (15.5 per cent) were in the voluntary sector.
- 67 per cent of available places in care homes for older people were in rooms with en-suite facilities and 86 per cent of available places were in single rooms.

Section One: Care Homes for Older People

Table 1 – Care Homes by Sector, Places and Residents, March 2005

	LA/NHS	Private	Voluntary	Total
Number of Care Homes	185	643	152	980
Number of Places	5,849	27,965	4,513	38,327
Number of Residents	4,928	24,658	4,003	33,589
Places per home	32	43	30	39
Occupied Places	4,942	24,689	4,005	33,636
Vacant Places	665	2,839	415	3,919
Unavailable Places	242	437	93	772
Occupancy Rate	88.6	89.8	90.8	89.8

Source: SCHC1 March 2005

In March 2005 there were 980 care homes for older people (20 of which were specifically for those with dementia). This compares to 1,060 care homes for older people in March 2000 and represents a reduction of 80 homes over this 5 year period.

The 38,327 registered places in March 2005 represent 46.4 places per 1,000 population and consists of 5,849 places (15 per cent) in the Local Authority/NHS sector, 27,965 places (73 per cent) in the private sector and 4,513 places (12 per cent) in the voluntary sector. Between March 2000 and March 2005 the total number of registered places fell by 753 (1.9 per cent) although this figure has increased in each successive census since

March 2003 as chart 1 illustrates. The change in registered places between March 2000 and March 2005 varied between sectors. In the Local Authority/NHS sector there had been a decrease of 611 registered places (9.5 per cent) whilst in the private sector there had been a small increase with an additional 142 places (an increase of less than 1 per cent). Finally, in the voluntary sector there had been a decrease of 284 places (a reduction of 5.9 per cent).

During the same period, the number of residents had fallen by 766 (2.2 per cent) from 34,355 to 33,589.

Of the 38,327 registered places, 33,636 were occupied on census night with an additional 772 places unavailable. Unavailable places are places that are temporarily or permanently out of use, perhaps due to refurbishment or building work. The remaining 3,919 registered places were vacant on the night of the census. The occupancy rate (occupied or unavailable places as a percentage of all places) was therefore 89.8 per cent.

Table 3 - Registered Places in Care Homes for Older People, Local Authorities with the Largest Increases/Decreases

LOCAL AUTHORITY	NUMBER OF REGISTERED PLACES		
	Mar-00	Mar-05	% change between Mar-00 and Mar-05

Aberdeen City	1,896	1,586	-16.4

Source: SCHC1 March 2005

Table 3 shows the local authorities with the largest increases and decreases in the number of registered places in care homes for older people between March 2000 and March 2005. Annex B contains details of registered places for each census between these dates for all local authorities.

The biggest increase in registered places since March 2000 has occurred in South Lanarkshire where the number of registered places has risen from 2,506 in March 2000 to 2,949 in March 2005 (a 17.7 per cent increase). This is despite a recent decrease in places in South Lanarkshire, the number having fallen from 3,006 in March 2004. Since March 2000, the number of care homes in South Lanarkshire has increased by 2. Other local authorities to have experienced large increases in the percentage of registered places were Clackmannanshire, where an additional 31 places had been added since March 2000 (an increase of 15.3 per cent), Fife, where there had been a 12.4 per cent increase in the number of places since

March 2000 and North Lanarkshire where the figure was 11.9 per cent.

The biggest percentage decrease in the number of registered places since March 2000 occurred in Aberdeen City. Here there had been a 16.4 per cent decrease, a reduction of 310 places. This corresponded to a net decrease of 6 homes over the same period. Other local authorities to have experienced a large decrease were the City of Edinburgh (a 12.9 per cent reduction in the number of places and a net decrease of 14 care homes), Stirling (11.5 per cent) and Dundee City (also 11.5 per cent).

Overall, across Scotland there had been a 1.9 per cent reduction in the number of registered places in care homes for older people. This corresponds to a decrease of 753 places.

Registered places and Occupancy Rates in Care Homes for Older People by Local Authority: March 2003 – March 2005

Table 4, below, shows the number of occupied, vacant and unavailable places in care homes and the number of places registered per 1,000 population aged 65 and over by local authority. It also provides the occupancy rates for March 2003 – 2005 by local authority. The occupancy rate is based on occupied and unavailable places as a share of total registered places. Information on unavailable places was first collected in March 2003.

An occupied place is one which currently has a resident or is committed to a resident who is temporarily absent (for example in Hospital). Places may be unavailable for a number of reasons including redecoration, reduced staffing and building works.

Across Scotland there were 46.4 registered places in care homes for older people for every 1,000 of the population aged 65 and over. This ranged from 29 in the Orkney Islands to 61.3 in South Lanarkshire.

South Lanarkshire also had the second lowest occupancy rate of all local authorities in Scotland. The occupancy rate in

Source: SCHC1 March 2005

South Lanarkshire in March 2005 was 85.4 per cent. In the previous three censuses, South Lanarkshire had the lowest occupancy rate. This position is now held by North Lanarkshire where the occupancy rate on 31 March 2005 was 81.7 per cent.

Across Scotland as a whole the occupancy rate was 89.8 per cent, the lowest level since this information was first collected in March 2003, down from 90.8 per cent in September 2004 and from 92.6 per cent in March 2003. For the second census in succession the highest occupancy rate was in Dundee City where 94.8 per cent of available places were either occupied or unavailable although this was down from 98.1 per cent in September 2004. Dundee City had 38.3 places per

1,000 population aged 65 and over, one of the lowest levels of all local authorities.

Care Homes for Older People: Facilities

Table 5: Facilities in Care Homes – March 2005

Occupied/Vacant Care Home Places	Without Ensuite	With Ensuite	Total Places
In Single Bedrooms	9,668	22,580	32,248
In Double Bedrooms	2,554	2,400	4,954
In Rooms with 3 or more Places	193	160	353
Total	12,415	25,140	37,555

Source: SCHC1 March 2005

On census night a total of 37,555 places were either occupied or vacant across all care homes in Scotland. Of these 32,248 (86 per

cent) were in single bedrooms, 4,954 (13 per cent) were in double bedrooms and 353 (around 1 per cent) were in bedrooms with 3 or more places. Since March 2003 there has been a small increase in the proportion of places in single bedrooms (up from 83 per cent) and a corresponding reduction in the percentage in double bedrooms (down from 16 per cent). Annex C provides the percentage of available places in single rooms for the Local Authority/NHS sector and the private/voluntary sector for each local authority. In the Local Authority/NHS sector 5,387 of the 5,607 available places (96 per cent) were in single rooms. In 17 of the local authorities 100 per cent of the available places were in single rooms and in all but one of the local authorities more than 87 per cent of places were in single rooms. In the private/voluntary sector 84 per cent of the available places were in rooms with one place registered. This included all available places (100 per cent) in Shetland Isles. More than three quarters (75 per cent) of all places were located in single rooms in 27 of the 32 local authority areas.

Table 6: Ensuite Facilities in Care Homes March 2003 – March 2005

Available Care Home Places	Mar-03	Sep-03	Mar-04	Sep-04	Mar-05
With Ensuite Facilities	22,673	23,189	23,941	25,033	25,140
Without Ensuite Facilities	14,481	13,967	13,460	12,545	12,415
% Ensuite	61	62	64	67	67

Source: SCHC1 March 2005

As table 6 shows, en-suite facilities were available in just over two third of all available places (25,140 places or 67 per cent). The proportion of available registered care home places with en-suite facilities has remained steady at 67 per cent since 30 September 2004, the number of places offering en-suite facilities having increased by 107 and the number of places without en-suite facilities having reduced by 130. Ensuite facilities were available in 70 per cent of places in single bedrooms.

Annex D shows the number and percentage of rooms with en-suite facilities split between the Local Authority/NHS sector and Private/Voluntary homes. This shows that, across Scotland, in the Local Authority/NHS sector 2,012 of the 5,607 available places (36 per cent) had en-suite facilities whilst 72 per cent of all private/voluntary homes had en-suite facilities.

There is also significant variation in the proportion of rooms with en-suite facilities between local authorities. In the Local Authority/NHS sector all of the available places in East Renfrewshire, Shetland Isles and South Lanarkshire had en-suite facilities. By comparison none of the available places in this sector in North Ayrshire, Midlothian, East Ayrshire, Renfrewshire or Clackmannanshire offered en-suite facilities.

In the Private/Voluntary sector all of the available places in Clackmannanshire and the Shetland Islands had en-suite facilities whilst none of the 16 available places in Orkney Islands were en-suite. In 14 of the 32 local authorities more than 75 per cent of places had en-suite facilities in this sector.

Overall, since March 2003, the proportion of places with en-suite facilities has risen from 61 per cent.

Care Homes for Older People: Closures and New Homes

Table 7: Care Home Closures by Sector

Census Period	Number of home closures			
	LA	Private	Voluntary	Total
Mar 2000 - Mar 2001	10	25	4	39
Mar 2001 - Mar 2002	5	21	3	29
Mar 2002 - Mar 2003	2	22	6	30
Mar 2003 - Sep 2003	1	6	3	10
Sep 2003 - Mar 2004	5	5	3	13
Mar 2004 - Sep 2004	5	13	0	18
Sep 2004 - Mar 2005	1	5	1	7
Total	29	97	20	146

Source: SCHC1 March 2005

Table 7 shows that 7 care homes closed between September 2004 and March 2005. Whilst this is lower than in previous census periods, there were 25 closures in the year between March 2004 and March 2005, up from 23 in the previous year. The 7 homes

that closed had an average of 21.7 places compared to the average size of all open care homes on 31 March 2005 of 39.1 places. Indeed, since March 2000, the average size of the 146 care homes which have closed was 23.9 places whilst the average size of all care homes open on a census night has ranged from 36.9 to 39.1 places during this period. Of these home closures the majority, 97 homes (66.4 per cent of closed homes) operated in the private sector. This is comparable to the 65.6 per cent of homes open on 31 March 2005 which were in the private sector. The average size of these closed homes was 22.4 places compared to an average of 43.5 places in privately operated homes open on the census night. Twenty-nine closed homes (19.9 per cent of closures, again comparable to the 18.9 per cent of open homes that operated in this sector on census night) were local authority run homes and had an average size of 27.5 places compared to 31.6 places in homes open on 31 March 2005. The remaining 20 closures (13.7 per cent) operated in the voluntary sector. On census night 15.5 per cent of open homes were in this sector. The average size of these closed homes was 25.9 places compared to an average size of 29.7 places amongst voluntary homes open on the most recent census night. Annex E provides a local authority split of care home closures between March 2000 and March 2005.

The 48 care homes which have closed between March 2003 and March 2005 provided a total of 1,181 places before closing, as shown in table 7. Of these, 931 places were available and, amongst these, 259 (or 27.8 per cent) had en-suite facilities. This compares to 67 per cent of places in homes open on 31 March 2005. In addition, of the 931 places available in these homes before they closed, 634, or 68.1 per cent of available places, were in single rooms. Amongst all care homes for older people open on 31 March 2005, 86 per cent of places were in single rooms.

Care Homes for Older People: Newly Opened Care Homes

Table 8: New Care Homes by Sector

Census Period	New care homes			
	LA	Private	Voluntary	Total
Mar 2000 - Mar 2001	2	11	4	17
Mar 2001 - Mar 2002	3	6	2	11
Mar 2002 - Mar 2003	1	4	2	7
Mar 2003 - Sep 2003	3	3	2	8
Sep 2003 - Mar 2004	4	4	0	8
Mar 2004 - Sep 2004	2	8	2	12
Sep 2004 - Mar 2005	0	5	0	5
Total	15	41	12	68

Source: SCHC1 March 2005

Since March 2000, 68 care homes have opened in Scotland. Over 60 per cent of these (41 homes) opened in the private sector whilst 15 homes opened in the local authority sector (22 per cent) and the remaining 12 (18 per cent) were run by voluntary organisations. These 68 new care homes offered a total of 2,639 places upon opening and had an average of 38.8 places varying from 51.4 places in new private sector homes to 18.9 places in new homes in the Local Authority sector. The average size of new voluntary sector care homes was 20.6 places. Annex E provides details of new care homes which opened between March 2000 and March 2005. The information is split by local authority.

Table 9: Facilities in New Care Homes and Closed Care Homes since March 2003

Source: SCHC1 March 2005

Table 9, above, shows that since March 2003 a total of 33 care homes have opened.

Upon opening, these homes offered a total of 1,610 places and of these, 1,472 (91.4 per cent) had en-suite facilities and 1,528 (94.9 per cent) were in single rooms.

Care Homes for Older People: Registered Places per Care Home

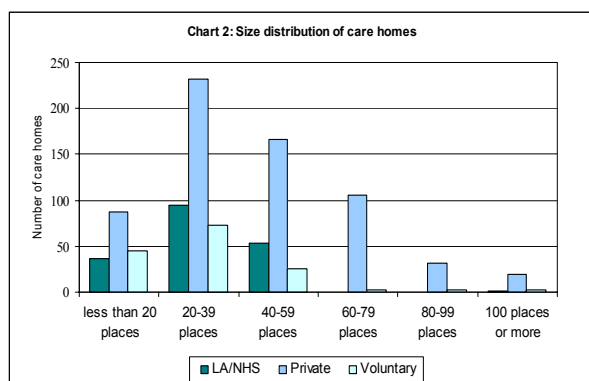

Table 10: Size of Care Homes – March 2005

80-99 places	0	32	3	35
100 places or more	1	20	2	23
Total	185	643	152	980

Source: SCHC1 March 2005

Table 10 and chart 2 show the number of homes with different numbers of places in each sector.

Over 40 per cent of all care homes for older people (400 homes) had between 20 and 39 registered places and this was the most common care home size in each of the 3 sectors.

Of the 185 care homes in the local authority sector, 131 had fewer than 40 places (70.8 per cent) and all but one home had fewer than 60 places. There was a similar distribution in the voluntary sector with 118 of the 152 care homes in this sector (77.6 per cent) offering less than 40 places and all but 8 care homes (5.3 per cent) offering fewer than 60 places. In the private sector, larger homes were more prevalent. More than half of the 643 care homes in this sector offered 40 or more places (324 homes or 50.4 per cent) and 20 of these

(3.1 per cent) offered 100 places or more. From table 1, there was an average of 39 places in care homes for older people on the most recent census night. This varied between sectors with an average of 32 places in homes operated by Local Authorities/NHS, 43 in the private sector and 30 in the voluntary sector. When compared to the average home sizes in March 2000 this represents an increase in the average size of private care homes from 40 places whilst the average size has fallen by around one place in local authority run homes and has remained stable in voluntary homes. Overall, the average size of a care home for older people has risen from 37 to 39 places since March 2000.

Care Homes for Older People: Admissions, Discharges & Deaths

Table 11, below, shows the number of residents in care homes on 30 September 2004 and on the most recent census night, 31 March 2005 along with admissions, discharges and deaths in the intervening period. On 30 September 2004 there were 33,983 residents in care homes, 33,060 of these were long stay residents and 923 were short stay. Over the subsequent 6 months, there were 16,221 admissions and 16,615 deaths and discharges. Thus, on the most recent census night there were 33,589 residents in care homes for older people. Nine hundred of these were short stay residents and the remaining 32,689 were long stay residents. There has been a decrease of 394 residents between these two census periods; this is around 1.2 per cent of the residents in care homes on 30 September 2004.

Of the 16,221 admissions during the 6 months between 30 September 2004 and 31 March 2005 7,007 (or 43 per cent) intended at admission to be resident for 6 weeks or more. The remaining 9,214 (57 per cent) consisted of residents for whom the predominant reason for admission was to provide respite care or whose intention was to stay for less than 6 weeks.

**Table 11: Number of Admissions, Discharges and Deaths in Homes for Older People
September 2004 – March 2005**

	SECTOR						TOTAL	
	LA/NHS		PRIVATE		VOLUNTARY		Long Stay	Short Stay
	Long Stay	Short Stay	Long Stay	Short Stay	Long Stay	Short Stay

Source: SCHC1 March 2005

In care homes run by local authorities or by the NHS there were a total of 5,231 admissions. These accounted for 32 per cent of all admissions (11.8 per cent of all long stay and 47.8 per cent of all short stay admissions). In the Local Authority/NHS sector, the majority of admissions (84.2 per cent) were for short stay or respite.

In the private sector there were a total of 9,132 admissions, 5,504 (60.3 per cent) of which were long stay and 3,628 (39.7 per cent) short stay. In total these represented 56.3 per cent of all admissions and included 78.6 per cent of all long stay and 39.4 per cent of all short stay admissions.

Admissions in the voluntary sector accounted for the remaining 11.5 per cent of all admissions including 9.6 per cent of all long stay and 12.8 per cent of all short stay admissions.

Between 30 September 2004 and 31 March 2005, 11,201 residents were discharged from care homes. Two thousand and eighty six of these discharges were long stay residents and 9,155 were short stay residents. Discharges from local authority run homes accounted for 43.6 per cent of all discharges whilst 43.8 per cent of all discharges were of residents in the private sector and 12.6 per cent were in the voluntary sector.

During the 6 months preceding the most recent census 5,414 care home residents died.

Of these the majority, 5,292 (97.7 per cent) were long stay residents and 4,276 of these were in the private sector.

Section Two: Care Homes for Physically Disabled People

Number of Residents	731	580	559	481	479	469	474	475

Source: SCHC1 March 2005

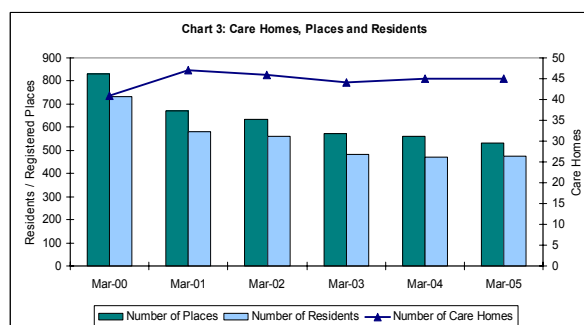

On 31 March 2005 there were 45 care homes for physically disabled people providing 531 places and with 475 residents. Amongst the 523 available places 457 (87 per cent) were in single rooms and 317 (61 per cent) offered en-suite facilities.

The figures show very little change from September 2004 when the same 45 homes provided 542 places to 474 residents. Since March 2000 the number of care homes has increased by 4 from 41. In the same period, the number of registered places has fallen from 831, a reduction of 300 places, and the number of residents has dropped from 731, down by 256. During this period the average care home size has fallen from 20.3 places to 11.8 places.

Of the 45 care homes for physically disabled people, the majority, 36 (or 80 per cent) were operated by voluntary organisations. These

voluntary homes offered 434 places to residents (81.7 per cent of all places). Just under 90 per cent of available places were in single rooms whilst 58.2 per cent offered en-suite facilities. Of the remaining 9 care homes, 3 were operated by local authorities and 6 were in the private sector.

Table 13 omits any homes that later deregistered (after March 2002) to become Housing Support services (more information on those can be found in annex F).

Section Three: Care Homes for Adults with Mental Health Problems

Table 14 – Care Homes by Sector, Places and Residents, March 2005

	LA/NHS	Private	Voluntary	Total
Number of Care Homes	5	17	90	112
Number of Places	81	335	821	1,237

Number of Care Homes	132	123	115	112	113	112	112	112
Number of Places	1,240	1,302	1,265	1,215	1,214	1,230	1,239	1,237
Number of Residents	1,094	1,132	1,128	1,082	1,081	1,082	1,108	1,110

Source: SCHC1 March 2005

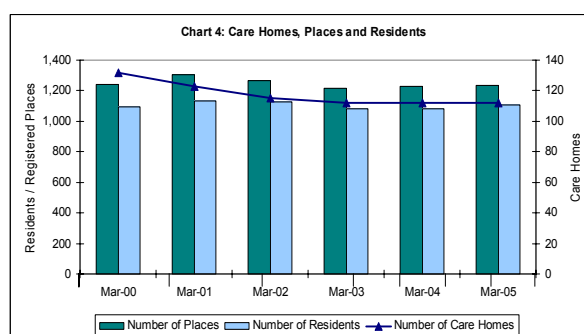

On the most recent census night there were 112 care homes in Scotland for adults with mental health problems. Of these more than 80 per cent (90 homes) were run by voluntary organisations. The 112 care homes offered a total of 1,237 places, 1110 of which were occupied by residents whilst 114 were vacant and the remaining 13 were unavailable.

The 90 care homes in the voluntary sector offered a total of 821 places and had an average of 9 places each. This compares to an average size of 20 places amongst the 17 privately owned care homes which offered a total of 335 places and housed 309 residents. The 5 local authority run care homes offered a total of 81 places and were, on average, 16 places in size.

Since the last census in September 2004, there has been little change in the number of care homes, registered places or residents in this client group. Indeed, since March 2002 the number of care homes has fallen by 3 from 115, the number of places has dropped by 28

and there has been a decrease of 18 residents from 1,128. Since March 2000, the number of care homes offering services in this client group has dropped by 20, from 132. However, in the same period the number of places has fallen by just 3 and there has been an increase in the number of residents, from 1,094 to 1,110 as chart 4 illustrates. The average size of a care home in March 2000 was 9 places.

Table 15 omits any homes that have deregistered to become housing support services (more information on those can be found in annex F).

Section Four: Care Homes for Adults with Learning Disabilities

Table 16 – Care Homes by Sector, Places and Residents, March 2005

	LA/NHS	Private	Voluntary	Total
Number of Care Homes	48	68	216	332

Unavailable Places	18	18	41	77
Occupancy Rate	81.4	94.4	92.7	91.3

Table 17 – Care Homes, Places and Residents, 2000 – 2005

	Mar-00	Mar-01	Mar-02	Mar-03	Sep-03	Mar-04	Sep-04	Mar-05
Number of Care Homes	389	378	352	342	343	343	335	332
Number of Places	3,685	3,497	3,184	3,064	3,073	3,008	2,875	2,840
Number of Residents	3,362	3,205	2,922	2,679	2,686	2,592	2,557	2,516

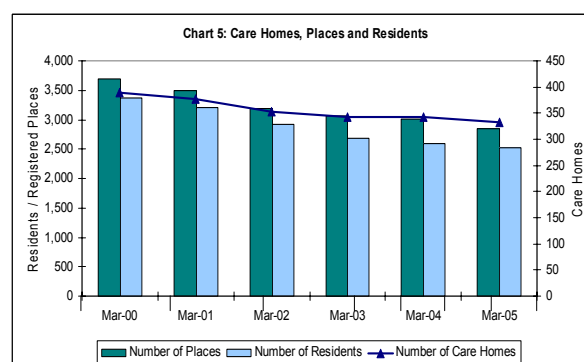

Source: SCHC1 March 2005

On 31 March 2005 there were 332 care homes for adults with learning disabilities. These homes offered a total of 2,840 places and had 2,516 residents. Just over 65 per cent (216) of the care homes in this client group and 53 per cent (1,498) of the registered places were in the voluntary sector whilst of the remaining care homes 68 (20.5 per cent) were in the private sector and 48 (14.5 per cent) were run by local authorities. The average size of these care homes varied from 7 places in the voluntary sector to 10 places in local authority homes to 13 places in privately operated care homes.

Since March 2000, the number of care homes has fallen by 57 from 389 in 2000 to the current level of 332 homes. There has been a corresponding drop in the number of places from 3,685 to 2,840. This is a reduction of 845 places (23 per cent) and there has been a corresponding fall in the average size of care homes over the same period. In March 2000 the average size of a care home was

9.5 places but by March 2005 this had fallen to 8.6 places.

The number of residents in care homes for adults with learning disabilities has fallen by 846 from 3,362 in March 2000 to 2,516 in March 2005. Table 17 excludes information on homes deregistering to housing support which can be found in annex F.

Section Five: Care Homes for Adults in Other Client Group

Table 18 – Care Homes by Sector, Places and Residents, March 2005

	LA/NHS	Private	Voluntary	Total

Source: SCHC1 March 2005

Care homes registered for other types of user can include homes for adults with acquired brain injuries, mothers and children, alcohol related problems, drugs related problems, AIDS/HIV and other vulnerable groups.

In March 2005 there were a total of 54 care homes for adults in other client groups. These homes offered a total of 765 places, an average of 14 places per home, and had 605 residents. The majority of the 54 homes (47 homes or 87 per cent of all homes) operated in the voluntary sector and these homes offered a total of 595 places, making the average size of a care home in the voluntary sector 13 places. Of the remaining 7 care homes, 4 were run by local authorities and 3 were privately run. The local authority run homes offered a total of 50 places (13 places per home) whilst the 3 private homes offered 120 places, an average of 40 places per home.

Since March 2000 the number of care homes in this client group has fallen by 18, from 72 to 54. This has coincided with a reduction of 217 places, from 982 to 765 and of 178 residents from 783 to 605. Table 19 omits information on care homes for other client groups that have deregistered to become housing support services (see annex F).

Background Information on the Census of Care Home Establishments

The Scottish Care Home census is intended to cover all adult care home establishments that are registered with the Care Commission. The Care Commission is responsible for regulating a wide range of social services and was established under the Regulation of Care (Scotland) Act 2001.

This census (first issued in March 2003) replaces two previous surveys. It combines the former 'Residential Care Home Census – R1' (run by the Scottish Executive) and the 'Private Nursing Homes Census' (run by ISD Scotland).

The figures from this census cannot be directly compared with the figures from the Residential Care Home and Private Nursing Home censuses as many homes were registered as both residential care homes and private nursing homes. Therefore simply adding together the final statistics published in those 2 surveys would result in double counting.

The 2000 to 2002 figures presented in this statistics release remove this element of double counting by combining the information from the residential care home census and nursing home census and comparing this with the information received in March 2003. All figures in the release are final apart from March 2005 which is provisional.

This census is issued twice a year (whereas the previous surveys were annual). The figures in this release relate to 31 March 2005. They are provisional and subject to change. Final figures will be published in the next care home census release which will relate to the situation on the 30 September 2005.

The number of open establishments covered by the March census was 1,523. Full or partial responses were received from 1,385 open care homes giving an estimated response rate of approximately 91 per cent.

The figures in this statistics release have been grossed up to take account of non-response. The methodology adopted was based on carrying forward previous records available for the care home in question. This methodology is different to that used previously for non-response, therefore care should be taken when making comparisons with the pre-2003 data.

Ongoing work to bring the database of care homes into line with that held by the Care Commission has led to a number of homes previously believed to have closed or de-registered to housing support having been brought back into this census while a small number of client groups have also been changed as a result of this work. Therefore historical data will be slightly different but more accurate in this release compared to previous ones.

Further numbers of homes across clients groups continue to deregister with the Care Commission as providing care for clients. These homes have not closed but have been omitted entirely from this statistics release. They are still operational and will be re-registering with the Care Commission as Housing Support services. Information on the number of homes deregistering for this reason is available in annex F.

Further Information

Further details and analysis of the data presented in this Statistics Release is available on request from the address following. The Statistics Release is also available on the Scottish Executive web site (www.scotland.gov.uk). This release was published on 22 September 2005

Notes:

1. Registered Places – The number of places registered in care homes for older people. Figures are given by local authority for March 2000, March 2001, March 2002, March 2003, September 2003, March 2004, September 2004 and March 2005.
2. % Change 2000 – 2005 – The percentage change in the number of registered places in care homes for older people between March 2000 and March 2005. The change is given by individual local authority and for Scotland overall.
3. % Change during 6 months to March 2005 – The percentage change in the number of registered places in care homes for older people between September 2004 and March 2005. The change is given by local authority and for Scotland overall.

Notes:

1. Number of Registered Care Homes by Local Authority – The number of care homes registered with the Care Commission within each local authority. Figures are given for March 2000, 2002, 2003, 2004 and 2005.
2. New – Care Homes that have newly registered with the Care Commission since the previous March census.
3. Home Closures – Care Homes that have closed and therefore cancelled their registration with the Care Commission since the previous March census.

Annex F

Care Homes that have Opened, Closed or Deregistered March 2000 – March 2005

The table below shows the number of homes that have opened, closed or deregistered to become housing support services during the 5 years from March 2000 to March 2005. This is the only table in this publication that contains historical data which includes homes that deregistered to housing support.

INTENDED CLIENT GROUP	Registered in March 2000	Closed between March 2000 and March 2005	De-registered to Housing Support since March 2002	Opened between March 2000 and March 2005	Registered in March 2005
Older people	1,073	146	15	68	980
Physical Disabilities	51	9	15	18	45
Mental Health Problems	202	40	88	38	112
Learning Disabilities	643	112	282	83	332
Other Client Groups	112	23	46	11	54
TOTAL	2,089	330	454	218	1,523

Source: SCHC1 March 2005

Notes:

1. 'Registered in March 2000' – The number of care homes by client group that were open on 31 March 2000. 2,089 care homes were open on this date.
2. 'Closed in-between March 2000 and March 2005' – The number of care homes by client group that have closed in-between March 2000 and March 2005. 330 care homes have closed in total during those 5 years.
3. 'De-registered to Housing Support since March 2002' – The number of care homes that deregistered with the Care Commission to become a Housing Support service. This is broken down by client group since March 2002. These homes are therefore omitted from the Scottish Care Home Census as they are no longer registered as a service providing care. 454 homes have deregistered since March 2002.
15 were primarily for older people/dementia
15 were primarily for physical disabilities
88 were primarily for adults with mental health problems
282 were primarily for adults with learning disabilities
46 were primarily for other client groups
4. 'Opened in-between March 2000 and March 2005' – The number of care homes by client group that have opened in-between March 2000 and March 2005. This figure will include any homes that opened, registered as a care service but then deregistered to become a Housing Support service. 218 care homes have opened in total during these 3 years.
5. 'Registered in March 2005' – The number of care homes by client group that were open and registered with the Care Commission as a service providing care on 31 March 2005. 1,523 homes were open on this date.

Annex G
