

FINAL RESULTS OF THE JUNE 2007 AGRICULTURAL CENSUS

Notes:

1. All figures have been rounded to the nearest 10. The sum of individual items may not, therefore, equal totals.
2. Percent figures have been rounded to the nearest 0.1%. 0.0% represents a change of less than 0.1%.
3. Following a reclassification exercise all results are published on a Main and Minor holding basis. The June 2007 final figures contain an estimate for minor holdings based on June 2006 figures.
4. A further update including the full results of the June 2007 minor census will be published by February 2008.

Further information and other agricultural statistics can be obtained from:

⁽¹⁾ Lupins are not available before 2003.

⁽²⁾ Maize is included within 'Crops for stockfeeding - other crops'.

⁽³⁾ The 2003 figure for linseed also includes flax, which was collected separately for 2003 only.

⁽⁴⁾ The 'other poultry' category (which includes turkeys, ducks, geese, guinea fowl, etc.) is volatile due to, for example, the incorrect inclusion of game birds on some census forms in some years.

⁽⁵⁾ In 1998, new questions were asked on the management of agricultural holdings, including whether legal and financial responsibility for the holding was undertaken by the occupier and other partners in a legal partnership. For such holdings, the labour questions distinguished the partners in the partnership working on the holding from hired and family workers. It appears that this change in questions may have led to the recording of workers who were not previously included in the returns. Figures from 1998 onwards are not therefore strictly comparable with those of previous years.
