	Example	Site 1	Site 2	Site 3	Site 4	Site 5	Site 6	Site 7	Site 8	Site 9	Site 10	Site 11	Site 12
Catchment	River Dee												
Site	Dee_Scot1												
Local site name													
Eastings (suggested)	332600												
Northings (suggested)	795700												
Eastings (actual)													
Northings (actual)													
Make	Gemini Dataloggers												
Model	Tinytag Aquatic 2												
Serial. No	350770												
Sampling Freq	15 minutes												
Date deployed in field	01/01/2014												
Time deployed in water	1600												
Absolute start time *	1730												
Start date													
Date removed	04/04/2014												
Time removed	1600												
Date Downloaded	04/04/2014												
Time Downloaded	1615												
File name	Dee_Scot1_040414												
Any breaks in data	no												
Logger buried (Yes / No)	no												
Logger exposed out of water (Yes / No)	no												
Is water able to pass through the tube (Yes / No)	no												
Is the tube still attached (Yes / No)	no												
Re-siting required (Yes / No)**	no												
Photograph taken (Yes / No)***	yes												
Additional comments	Data looks OK												

\* Time deployed in water + 1.5 hours and rounded up to nearest 15 minutes

\*\* If datalogger is re-sited, request a new record sheet

\*\*\* Notes about taking photograph:

Photograph direction – facing upstream/facing downstream

Please take a photograph of the logger situation, which shows its position in the surrounding landscape

Please include the river, river banks and any surrounding hills/woodland in the photograph; this should help someone else to find the logger
