**12. Are you aware of any information or evidence that you think the Scottish Government should consider in relation to regulating domestic advertising in relation to impacts on children and adults (including smokers and non-smokers)?**

The medical evidence regarding harm of tobacco smoking is well established. Children should not be introduced to smoking – including adults should not smoke around children. I believe connected to this that it would be a backwards step for Children to then be seeing adults smoking ecigarettes as it familiarises with the concept of smoking and thereby increases the chances of Children wishing to try smoking of one kind or another.

**13. Are you aware of any information or evidence that you think the Scottish Government should consider in relation to regulating domestic advertising in relation to impacts on business, including retailers, distributors and manufacturers?**

This should not be a consideration, if business is affected, too bad. Commerce should be prioritised above health.

**E-cigarettes – use in enclosed public spaces**

**17. Do you believe that the Scottish Government should take action on the use of e-cigarettes in enclosed public spaces?**

Yes X No ☐

**18. If you answered 'yes' to Question 17, what action do you think the Scottish Government should take and what are your reasons for this?**

I have experienced people smoking ecigarettes in bus shelters and on the top deck of a bus. Asked both to stop, one refused and was quite cheeky, the other did stop though then felt fine aggressively attacking me. These people did not appear to understand the matter of considering others comfort. If ecigarettes were formally a blanket part of the ban and for this to widely be known, then it would be far easier to prevent people doing this or tackle them if they are showing a lack of consideration.
