APPLICATION FOR APPROVAL OF A SCHEME FOR CERTIFICATION OF CONSTRUCTION OR DESIGN – SECTION 7(2)

GUIDANCE NOTES

Before completing the application form please refer to the guidance notes below as well as to the guidance contained in both the Scottish Government Building Standards Division (BSD) Procedural Handbook and Certification Handbook. Both of these publications can be viewed or downloaded from the BSD Website at (www.sbsa.gov.uk).

Title of	The title should be very precise identifying the specific areas of work	
Title of Scheme	being certified and highlighting any limitations of the proposed Scheme.	
Section A	Scheme Details	
This section identifies the Scheme the applicant wishes to deliver. The title		
and scope of the Scheme should clearly identify the specific area of work		
being certified and any limitations that may apply.		
A1.1	Scope should be described in terms of elements of construction/design	
	or performance of construction/design. Description should make	
	reference to the relevant associated Building Standards or to a self-	
	contained project and should include any general limitations that apply.	
	For example: 'Compliance of design of Heating and Ventilation	
	installation, non-domestic, with Building Scotland Regulations 2004'	
A1.2 – 1.3	Provide details of any specialist activities that require a higher level of	
	qualification or experience which not all Approved Certifiers may be	
	competent to undertake. There is no limit to the number of designations	
	that can be included. BSD will consider the range of skills and capacity	
	within the organisation to deliver them.	
A1.4	Outline the viability of the proposed Scheme in terms of demand within	
	the industry, existing competing schemes and probable market share. If	
	demand or projected uptake is low, or unknown, please explain the	
	rationale for proposing this Scheme. BSD must be satisfied that there	
	will be sufficient uptake to justify approval of the Scheme.	
Section B		
	on requests details of the set criteria for membership of the Scheme	
	f minimum levels of competence, qualifications and experience for	
	oved Certifiers and relevant personnel within Approved Bodies.	
	also required of the initial and ongoing assessment and training of	
	nel involved in the delivery of the Scheme.	
B1.1 – 1.2		
	become an Approved Certifier, including those relevant to any	
	applicable designations identified at Section A1.3. Details of relevant	
	qualifications and range of experience required for membership must	
B1.3	also be specified within the membership application form.	
51.5	Explain how you will assess an applicant's understanding of the Building (Scotland) Regulations, interpretation of the Building Standards	
	and the inter-relationship of the Building Standards relevant to the	
	Scheme. Will a training course be developed and will attendance be	
	mandatory?	
	manualory :	

	Note: Duilding Ctondards Division will excit the development of environment
	Note: Building Standards Division will assist the development of any
D 1 0	training course or guidance material relating to the building standards.
B1.3	Describe what procedures will be adopted by Approved Certifiers to
	establish that work complies with building regulations. For example, use
	of Scheme checklists, reference to third parties, peer checking of work
	done.
B1.4	Members must have an understanding of the certification processes –
	such as the role and responsibilities of an Approved Certifier,
	Certification Coordinator and Approved Body and the documentation
	required for certification etc. Explain how you will assess the
	understanding and competence of applicants to the Scheme in relation
	to the operation of the Scheme and the certification processes as well
	as their understanding of the Scottish building regulations. For example,
B2.1	development of a training course and relevant assessment/examination.
DZ. I	Specify the minimum experience and level of authority required for the Certification Co-ordinator role.
B2.2	What procedures will be put in place to confirm that checking covers all
D2.2	relevant building standards and any inter-relationship between
	standards? For example, will Scheme checklists be used or
	independent checks be carried out by others to establish that work
	complies with building regulations?
B2.3	What measures will be put in place to ensure Approved Bodies provide
D2.3	Approved Certifiers with ongoing access to relevant documentation
	such as Scheme technical guidance, relevant building legislation,
	technical handbooks etc.
Section C	
	on requests details of the logbooks and application forms which will
	e developed for issue to applicants to the Scheme as either an
	Body or Approved Certifier. These forms should be submitted with
your applie	• • • •
C1.1	The Approved Certifier application form should give as much detail
	about the applicant including full personal and contact details,
	qualifications, experience (type of work, number of projects and level of
