

<u>Question</u>	<u>Answer</u>
Do you support the development of an MPA network in Scotland's Seas?	Yes
Designation	It would be better if the area covered was all round the island
Management Options	Coasts management system I would support No dredging for prawns or trawling or razor clam fishing
Socioeconomic Assessment:	This is so much healthier for the sea area and will encourage tourism and rejuvenate the sea angling that has been desimated by trawling in the area.
Other Comments	Proper management needs to be adhered to and also the West of Scotland There are far to many fish farms being allocated room on the West Coast eg Loch Craignish this is polluting the water and ruining the area the Scottish Government seem intent on ruining one of our greatest assets and I for one would not want to come to see fish farms and wind farms everywhere.
