

CONSULTATION QUESTIONS

1. Do you support the development of an MPA network in Scotland's Seas?

Yes

Comments - Very strongly support the proposal of all MPA's and want to a large network of these areas.

Individual possible Nature Conservation MPAs

2. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Clyde Sea Sill* possible Nature Conservation MPA?

Designation: Yes No

Comments

Management Options: Yes No

Comments

Socioeconomic Assessment: Yes No

Comments

All of the above: Yes No

Comments

3. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *East Caithness Cliffs* possible Nature Conservation MPA?

Designation: Yes No

Comments

Management Options: Yes No

Comments

Socioeconomic Assessment: Yes No

Comments

All of the above: Yes No

Comments

4. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *East of Gannet and Montrose Fields* possible Nature Conservation MPA?

Designation: Yes No

Comments

Management Options: Yes No

Comments

Socioeconomic Assessment: Yes No

Comments

All of the above:

Yes No

Comments

5. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Faroe-Shetland sponge belt* possible Nature Conservation MPA?

Designation:

Yes No

Comments

Management Options:

Yes No

Comments

Socioeconomic Assessment:

All of the above:

Yes No

Comments

6. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Fetlar to Haroldswick* possible Nature Conservation MPA?

Designation:

Yes No

Comments

Management Options: Yes No

Comments

Socioeconomic Assessment: Yes No

Comments

All of the above: Yes No

Comments

7. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Hatton-Rockall Basin* possible Nature Conservation MPA?

Designation: Yes No

Comments

Management Options: Yes No

Comments

Socioeconomic Assessment: Yes No

Comments

All of the above: Yes No

Comments

8. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Loch Creran* possible Nature Conservation MPA?

Designation: Yes

Comments - this area is a well known hotspot and upgrading the current protection is long overdue.

Management Options: Yes No

Comments - inclusion of diver code of conducts would be useful. Have seen/heard of some areas suffering from damage. Perhaps a dive trail could be introduced with clear swimming paths?

Socioeconomic Assessment: Yes No

Comments - there is an attraction in diving here and people have been traveling here from other countries to observe the serpulid reefs. There is a tourism benefit to the lochs marine community from recreational diving.

All of the above: Yes No

Comments

9. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Loch Sunart* possible Nature Conservation MPA?

Designation: Yes No

Comments - having dived this area for years it has a diverse ecosystem and with the discovery of additional serpulid reefs should be considered for full protection.

Management Options: Yes No

Comments

Socioeconomic Assessment: Yes No

Comments

All of the above: Yes No

Comments

10. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Loch Sunart to the Sound of Jura* possible Nature Conservation MPA?

Designation: Yes No

Comments - this area is a highly special area and has the Firth of Lorn SAC. With unique features such as the Corryvreckan Whirlpool and surrounding tidal race environs. Full protection of this area would be beneficial to the marine environment and tourism.

Management Options: Yes No

Comments

Socioeconomic Assessment: Yes No

Comments - our business operates in this area and full MPA protection would be beneficial both from increasing the recovery of the marine environment, increase of marine species and from tourism marketing of visiting a reserve area.

All of the above: Yes No

Comments

11. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Loch Sween* possible Nature Conservation MPA?

Designation: Yes No

Comments - full support of this unique area.

Management Options: Yes No

Comments - access should be made available for boats and swimmers/divers.

Socioeconomic Assessment: Yes No

Comments - as above comments, the site is used by recreational divers and provides a unique and interesting area for observation and underwater photography.

All of the above: Yes No

Comments

12. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Lochs Duich, Long and Aish* possible Nature Conservation MPA?

Designation: Yes No

Comments - fully support this with protection for the *Limaria* beds.

Management Options: Yes No

Comments

Socioeconomic Assessment: Yes No

Comments

All of the above: Yes No

Comments

13. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Monach Isles* possible Nature Conservation MPA?

Designation: Yes No

Comments - full support due to the importance for grey seals.

Management Options: Yes No

Comments - access to divers/swimmers to be provided.

Socioeconomic Assessment: Yes No

Comments

All of the above: Yes No

Comments

14. Do you have any comments on the case for designation, management options and socioeconomic assessment for the *Mousa to Boddam* possible Nature Conservation MPA?

Designation: Yes No

Comments

Management Options: Yes No

Comments

Socioeconomic Assessment: Yes No

Comments

Choices to represent features in the MPA Network

28. Recognising the scientific advice from JNCC included alternatives for representing offshore subtidal sands and gravels, ocean quahog and shelf banks and mounds in the Southern North Sea, do you have a preference or comments on the following combinations to represent these features, bearing in mind Turbot Bank will need to be designated to represent sandeel in this region:

Firth of Forth Banks Complex

Turbot bank and Norwegian Boundary Sedimentary Plain

Or Firth of Forth Banks Complex, Turbot bank and Norwegian Boundary Sedimentary Plain

Comments

29.

Do you have any comments on the case for designation, management options and socioeconomic assessments for the preference you have indicated in the question above, regarding alternatives for representing offshore subtidal sands and gravels, ocean quahog and shelf banks and mounds in the Southern North Sea?

Yes No

Comments

30. Recognising the scientific advice from JNCC included alternatives for representing the burrowed mud feature in the Fladens, do you have a preference or comments on the following combinations to represent these features, bearing in mind the part of Central Fladen (known as Central Fladen (Core)) containing tall seapen (*Funiculina quadrangularis*) will need to be designated to represent tall seapen in this region:

Central Fladen pMPA only

The tall sea-pen component of Central Fladen, plus Western Fladen

Or the tall sea-pen component of Central Fladen, plus South-East Fladen.

Comments

31. Do you have any comments on the case for designation, management options and socioeconomic assessments for the preference you have indicated in the question above, regarding alternatives for representing the burrowed mud feature in the Fladens?

Yes No

Comments

32. Recognising the scientific advice from JNCC included alternatives for representing offshore subtidal sands and gravels, offshore deep sea mud, and burrowed mud in OSPAR Regions III and V, do you have a preference or comments on the following combinations to represent these features:

South-West Sula Sgeir and Hebridean slope

Or Geikie slide and Hebridean slope

Comments

33. Do you have any comments on the case for designation, management options and socioeconomic assessments for the preference you have indicated in the question above, regarding alternatives for representing offshore subtidal sands and gravels, offshore deep sea mud, and burrowed mud in OSPAR Regions III and V?

Yes No

Comments

Sustainability Appraisal

34. Do you have any comments on the Sustainability Appraisal of the MPA network as a whole?

Yes

Comments - the worldwide studies and statistics show that marine reserves work both from ocean recovery and an economic point of view. There can only be benefit from a large network of MPA's

Provisions should be made for sustainable fishing and industry within these reserves and a robust environmental planning system should regulate any licenced industry.

Final Thoughts

35. On the basis of your preferences on which pMPAs should be designated, do you view this to form a complete or ecologically coherent network, subject to the completion and recommendations of SNH's further work on the 4 remaining search locations?

Yes No

Comments - We are strongly in favour in a robust MPA for the Skye to Mull search area for specific protection of Basking Sharks and Cetaceans. With current threats including a large scale offshore wind farm and fish farms, there are industrialisation plans currently in motion without full and adequate consideration of effects to basking sharks. With a survey citing over 900 sharks in the search area in Aug 2012, the evidence is pointing towards an area of world importance to these sharks. We look forward to seeing a full scale MPA proposal without further delay but understand that the proposal is waiting on results from 2013 tagging project. Consideration of the impending MPA proposal must be cited if any marine planning applications are submitted in the time being.

36. Do you have any other comments on the case for designation, management options, environmental or socioeconomic assessments of the pMPAs, or the network as a whole?

Yes No

Comments - The Scottish Government has a legal obligation to enhance Scotland's seas and, according to international recommendations, the MPA network must support the wider marine environment. For each MPA, effective management must therefore be in place so that species and habitat recovery is possible both within and beyond the boundaries of the site. Zonal management that protects only the remnant extent of marine species and habitats, particularly of vulnerable benthic features, is not enough given the context of ecological decline documented in Scotland's Marine Atlas.
